

My Summer as a Digital Nomad

Getting out while getting work done

Washington

My Remote Requirements

Angular Developer on Large Complex Monorepo

Application depends on API
Access for Auth and Data

Intermittent Connectivity to
Internet workable for this

Access to GitHub, Jira,
Confluence Wiki and other
internal webapps

Intermittent Connectivity to
Internet workable for this as
well

Need to be available for Scrum
Ceremonies and other Team
Meetings via Voice

Consistent Connectivity to
Internet Required

Equipment
that made it
possible

Starlink Satellite Internet
(Residential or Roam)

Equipment
that made it
possible

Equipment
that made it
possible

Portable Monitor
(Powered via USB-C)

Equipment
that made it
possible

Bluetooth Headphones
(Microphone + Noise Cancelling)

Equipment
that made it
possible

Bluetooth Wireless Mouse
(Mousepad optional but nicer)

Equipment
that made it
possible

Equipment
that
p

Charging Cables
(USB Hub if necessary)

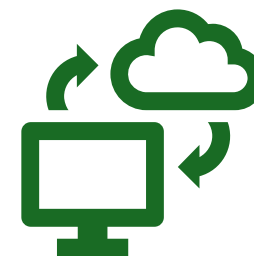

Tips

- Communicate
 - Let your Manager and Team know when traveling & working
 - Especially if you will be in a different time zone
- Plan
 - Check on your company policies, especially for a different country
 - Tax Requirements can change
 - Have a back-up options, especially for Internet
 - Mine was:
 - cell phone hotspot
 - campground internet
 - then coffee/café wi-fi

Takeaways

Don't be afraid to get out even if
you need to continue working

With access to Internet, many
developers can work almost
anywhere
